RENEWABLE ENERGIES

The successful exhibition **genera Latin America** joins, for the celebration of its 4th edition in 2019, to the **III FAIR AND CONFERENCE OF RENEWABLE ENERGIES EXPO ERNC**, consolidated as a benchmark in the industry in Chile that has reaped great success in its first two editions.

This creates a **great professional meeting** to exchange experiences, knowledge, training and technologies to improve the production standards of the thriving sector of **alternative and non-conventional energies**.

ELECTRICITY & ELECTRONICS

The third version of **MATELEC Latin America** will be held in coincidence with the event of renewable energies, continuing with the formula followed in the last two editions of the exhibition in Santiago de Chile.

MATELEC Latin America has positioned itself as the benchmark appointment for the electrical and electronic sector throughout the Southern Cone, serving Chilean and international companies as a commercial showcase and an industry meeting point for the entire region.

LAS ENERGÍAS RENOVABLES

EXHIBITOR PROFILE

Companies supplying equipment, technologies, services and products for the sectors of:

- Biofuels, Biomass, Cogeneration, Geothermal Energy, Wind, Hydraulics, Tidal, Solar, and Energy Efficiency
 - Management and Projects
 - Technologies for energy saving
- Storage, transport and distribution of energy
 - Waste treatment as an energy source
- Techniques and Technologies for CO2 capture
 - Advice and consultancy
- Support and Development Institutions
 - Banks and Financing companies
 - Academic and Research Entities
 - Training and qualification
 - Insurance

VISITOR'S PROFILE

Professionals related to the following sectors:

- Professional consultants, engineering, construction, architecture, trade
 - Industrial users of energy
- Equipment manufacturers and distributors
- Installers, contractors and maintenance companies
 - Promoters of energy projects
- Universities, research and development centers
 - Specifiers and real estate developers
- Public Administrations and in general, all professionals related to the world of NCRE, energy and environmental efficiency

MATELEC
Latinoamérica 2019

3rd International Exhibition of Solutions for
the Electrical and Electronic Industry

EXHIBITOR PROFILE

Suppliers companies in the sectors of:

- Automation, Industrial and Electronic Energy Control
 - Development and Research
- Electronics Assembly and Manufacturing Services
 - Management of Electric Power
 - Engineering and consulting services
 - Instrumentation and Measurement
- Support services for Electronics (Defense, Communications, Logistics, Medical Equipment, Mining, Industries in general, etc.)
 - Lighting solutions and public and residential lighting
 - Solutions for Buildings and Smart Cities
- Technology and components of the Electrical Installation
 - Telecommunications and Networks
 - Low and medium voltage equipment

VISITOR'S PROFILE

Professionals related to the following sectors:

- Electric Companies
- Industries: Mining, Forestry, Chemical, Petrochemical, Metalworking, Food, Pharmaceutical, other Industrial Processes
 - Engineering and Consulting Companies
 - Large User Companies of Electric Power
 - Generators of Electricity
 - Construction and Real Estate
- Architecture Offices and Lighting Projects
- Public Administration: Ministry, MTT, SEC, MOP
 - Installers and Integrators

 - EDITEC
 - IFEMA, Feria de Madrid
- ❑ Dates:
 - November 27th-29th, 2019 in Santiago, Chile
- ❑ Venue:
 - Santiago Business & Conference Center
- ❑ Opening times:
 - Trade fair: 10 am – 6 pm
 - Conferences: 9 am – 5 pm

MIEMBROS DE:

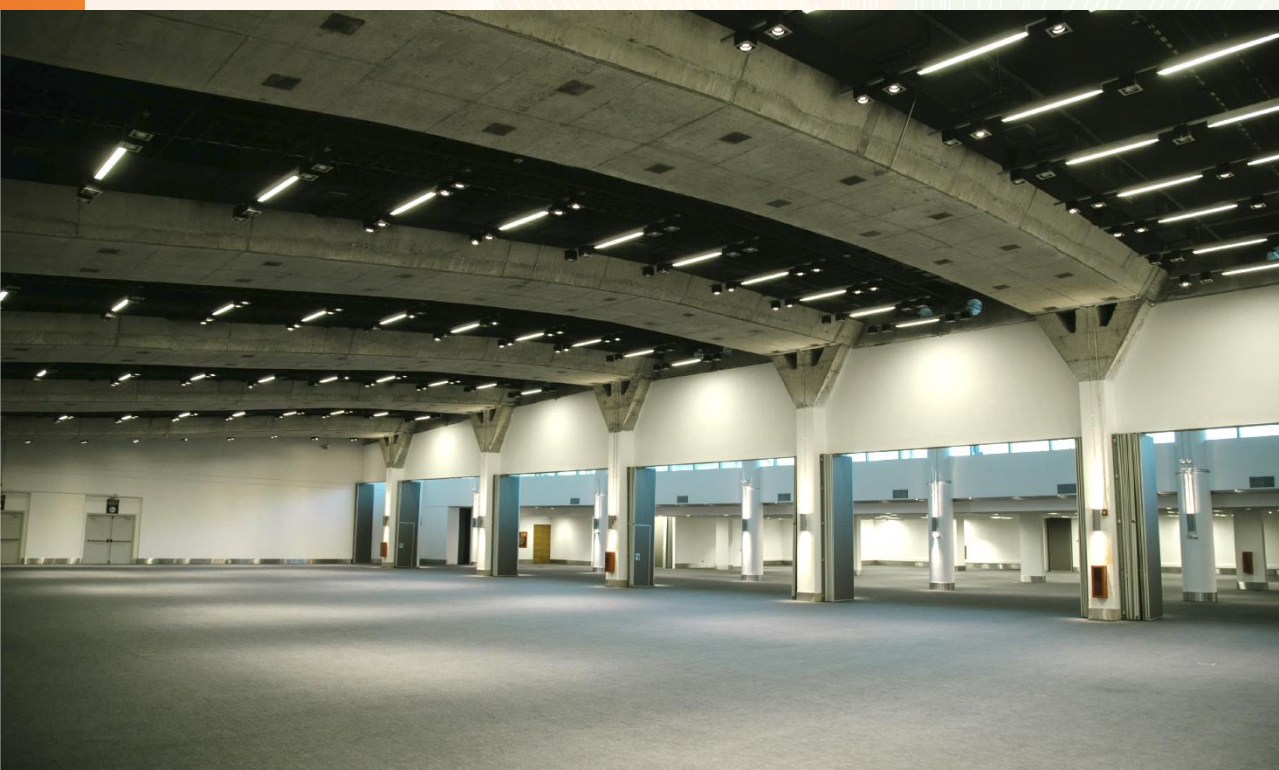

Santiago Business & Conference Center, the convention center in Parque Titanium, is a place of first level for the realization of any kind of event. Its 5,500 sq.m. of built areas, more than 3,700 sq.m. of available spaces and 550 parking lots make it a unique alternative for the development of fairs, seminars and congresses. In the salons, its great height stands out - more than seven meters - as well as the versatile and modern design, which allows flexibility in the modulation of spaces, and the entrance of natural light. The center has state-of-the-art technology and offers an excellent catering service, which allows the development of a quality exhibition.

The greatest attribute of SBCC is its location, in the middle of "Sanhattan", the most important financial pole of the country. Steps away from an offer of complementary services to the events, which allows visitors to live a unique experience in their fairs, conferences or seminars, which take place in a park that interacts with the river and is framed by the vegetation of the hills San Cristóbal and Manquehue.

SBCC is located at the base of Parque Titanium, steps from 2 metro stations - El Golf and Tobalaba - and public train transportation. Easy access to highways, by bicycle, public transport or on foot, in addition to its 550 parking lots.
