WASTE MANAGEMENT:

- The exhibitor/assembler is the generator of the waste and shall therefore be responsible for its removal and management. How the waste generated by the exhibitor is managed is explained in article 35 of the General Rules of Participation.
- We offer our exhibitors a service that includes the removal and management of the waste they/their assemblers generate. (check our fees in Exhibitors' Area).

Carpet recycling:

IFEMA MADRID recycles 100% of the carpeting used in aisles and communal areas. To do so it has been essential to change our assembly and disassembly process, that affects the entry and removal of goods (check the corresponding item). Furthermore, means that it has to be laid in strips instead of covering the entire surface area as was previously the case. This means we can guarantee its conversion into a new raw material for the subsequent manufacture of other products.

SUSTAINABLE MOBILITY:

IFEMA MADRID offers: access to public transport close to its facilities (metro and bus), parking for electric cars with 100% renewable electricity charge points, as well as a parking area for bicycles and scooters.

GUIDE TO SUSTAINABLE PARTICIPATION IN TRADE FAIRS/EVENTS:

IFEMA MADRID has published its Guide to Sustainable Participation in Trade Fairs for exhibitors on its website. We recommend you read it before starting to prepare your participation:
