SICUR 2024 calls for integrated security, a key sector for economic development and social welfare

From February 27 to March 1, organized by IFEMA MADRID, the International Security Exhibition brings together the main innovations and current debates on the importance of security for socio-economic development.

The participation of the 24th edition amounts to 654 direct exhibitors and an international participation of 24.8% from 31 countries.

A new feature is EXO CORNER, on the irruption of exoskeletons, and the content offer is completed with the SICUR FORUM, with the latest industry news, SICUR CYER, on cybersecurity, and the INNOVATION GALLERY.

SICUR 2024, the International Security Exhibition organized by IFEMA MADRID, opens its doors from February 27 to March 1 to show the professional world the latest innovations with a strong technological character in the field of comprehensive security along the pavilions 4, 6, 8 and 10. Thus, it brings together the main companies and associations of Security, Fire Safety and Emergency and Occupational Safety in a professional fair that combines the exhibition of services and solutions with the exchange of knowledge and content.

In its 24th edition, SICUR offers a comprehensive view of security with a total participation of 654 are direct exhibitors with an international presence is 24.8% from 31 countries. In addition, for the second consecutive edition, the event will be hybridized through **SICUR LIVE Connect**.

SICUR, structured in three main sectors

As in previous editions, SICUR is organized around three major sections, both in terms of exhibition and content. **Occupational Safety**, which in Halls 4 and 6 represents 43.2% of the Fair's offerings, presents an offer at the service of workers' well-being, the latest innovations in personal protective equipment (PPE), occupational health proposals and solutions for the prevention of occupational hazards. Thus, professional visitors will be able

Dossier de prensa

to see new lines of footwear, goggles or professional protective gloves, innovative materials with sustainable and recyclable components and ergonomic designs with improvements in the comfort of harnesses, fasteners, masks, respiratory equipment and uniforms, among others.

Hall 10 of the Fairgrounds will host the **Security** segment, which represents 34.5% of the Fair's offer, and brings together companies and experts in physical security, electronic security, security services and technological innovation for the protection of lives and property. Leading companies in the sector will present their innovations in which Artificial Intelligence plays a major role, innovative security cameras and intrusion detection, smart safes, drones, biometric solutions, improved armored doors or locks with remote control and activity recording.

Fire Safety and Emergencies, which represents 21.8% of SICUR, will be held in Pavilion 8 and will include the participation of the Security, Emergency and Civil Protection Forces and Corps and the presentation of companies that bring to the show the latest advances in detection and extinguishing systems, forest protection, rescue stabilization systems and equipment and vehicles.

Knowledge and best practices, SICUR's complementary value-added offering

SICUR's exhibition offer is complemented by a full program of content around the three fundamental axes around which the event is organized, along with cybersecurity, which is key in an increasingly digital world, and the emergence of exoskeletons.

During the four days of the fair, **FORO SICUR**, organized together with the main associations and organizations that represent professionals and users in the world of security, promotes the creation and exchange of knowledge and best practices and provides content of informative and educational interest. It will be held in the auditorium of Pavilion 10, the Retiro Hall and the SUR Auditorium and, among other topics, will address the use of AI in the fight against domestic violence, security in the management of cultural heritage, the evolution of locksmithing, basic passive protection sheets, sustainability in a fire, the presentation of the drone unit of the UME (UDRUME) and the 30th anniversary of the Occupational Risk Protection Act.

Consult the program of FORO SICUR

SICUR's commitment to offering value-added content for comprehensive security is complemented by **SICUR CYBER**, a space co-organized with Seguritecnia and Red Seguridad focused on cybersecurity at the service of comprehensive security. This space will offer a program of conferences to increase the culture of cybersecurity and give voice to the main challenges and advances that exist.

Consult the program of SICUR CYBER

In addition, **EXO CORNER** is the great novelty of this edition created in collaboration with the Institute of Biomechanics (IBV) and will address the irruption of exoskeletons in occupational health and safety. This new space will have a Speaker's Corner with an interesting program with contents such as the first active soft exoskeleton for the hand or the fusion between the body and the exoskeleton.

Consult the program of FORO SICUR

It is also worth mentioning the presence and participation of representatives of the **Security, Emergency and Civil Protection Forces and Corps**. National Police, Civil Guard, Military Emergency Unit, Mossos d'Esquadra, Ertzaintza, Security and Emergency Agency 112 of the Community of Madrid and Municipal Police, SAMUR-Civil Protection and Firefighters of the City of Madrid, will organize activities, workshops and demonstrations at their stands that will allow visitors to learn about their equipment and best practices.

Finally, as in every edition, the **INNOVATION GALLERY** will show a preview of the lines of research and development in which companies in the security sector are working. On this occasion, 26 solutions have been selected, of which 7 are for Fire and Emergency Safety, 7 for Security and 12 for Occupational Safety.

Products of Innovation Gallery

From February 27 to March 1, 2024, IFEMA MADRID will host the most important event in integrated security, where knowledge and best practices, the presentation of technological innovations from leading companies and live demonstrations will converge.

FORO SICUR 2024 gathers renowned experts to address opportunity and challenges for comprehensive security

The International Security Exhibition, organised by IFEMA MADRID from 27 February to 1 March, includes FORO SICUR, a space for analysing the importance of security for socioeconomic development, debating the current situation of the sector, and presenting its main novelties.

SICUR 2024 is the International Security Exhibition organised by **IFEMA MADRID**, taking place from **27 February to 1 March**. It includes the **FORO SICUR**, a space for analysis and debate on the importance of comprehensive security for socio-economic development, social and individual welfare, and the challenges facing the sector. Additionally, new products and innovations will be presented.

FORO SICUR takes place in three locations: the auditorium of **Pavilion 10, Sala Retiro**, and the **Auditorio SUR** of the Recinto Ferial. The event is organised around the Fair's three sectors: Security, Fire and Emergency Safety, and Occupational Safety. Additionally, SICUR CYBER covers cybersecurity.

FORO SICUR is organised by **IFEMA MADRID** in collaboration with the main associations and organisations representing professionals and users in the world of security. Its aim is to increase the value of the fair by promoting the creation and exchange of knowledge and best practices and providing informative and educational content.

Conferences on Security

On 27 February, the **Valencia Police Service** will host 'AI in the fight against domestic violence: a police perspective'. This will be followed by 'The security function in the management of cultural heritage', organised by **PROARPA** and **ASIS INTERNATIONAL**. After the lunch break, **APECS** (Association of Professionals of Spain in Locksmithing and Security) organised the round table 'Evolution of Locksmithing'. On the first day of SICUR, **CDTI** is organising a 'Flash Information Day. Call to Tender 2024 Cluster 3, Horizon Europe.' in Sala Retiro.

Dossier de prensa

On Wednesday 28th morning, the **Observatorio Mujeres de la Seguridad** will present two reports: '43 years of **AES** energising the private security industry: collaboration and cooperation with various agents in our industry' and 'The 3rd Report on the status of women in public and private security: continuing to move forward.' The S2R-2024 Congress on Safety, Security & Resilience Research in Europe is also scheduled for this day.

On 29 February, the **PESI** S2R Awards will be presented in Sala Retiro, followed by technical sessions. In the afternoon, the Women and Innovation in Safety Awards will take place. On 1 March, the Security Days will conclude with a discussion on 'Security video cameras and their compatibility with non-security uses' by **CEUSS**.

Fire and Emergency Safety Conferences

On 27 February, **TECNIFUEGO** will host a series of presentations on fire protection. The first presentation will be 'Basic passive protection product sheets'. This will be followed by a presentation on 'Fire protection in the framework of occupational risk prevention' by **APICI**. **CEPREVEN** will then present their guide on the 'Procedure to certify CFPA-E Fire Safety Specialists in Building Design'. The event will conclude with a presentation on 'Emergency management and its standardisation in fire brigades', organised by **ASELF**.

On 29 February, Pavilion 10's auditorium will host a monograph on sustainability. Thus, experts from **CEPREVEN**, **TECNIFUEGO**, **APICI**, **ASELF**, and **APT B** will discuss the 'current challenge for the future of sustainability and disaster fires'. The discussion will focus on the impact of 'Photovoltaic generation', 'Lithium-ion batteries', and 'High-rise buildings and façades'. On 1 March, the Military Emergency Unit (**UME**) will present its UDRUME drone project. It was used during the earthquake in Türkiye a year ago.

Occupational Safety Conferences

On Wednesday 28 February, **Fundación Mapfre** and **INSST** will host an event in the Auditorio Sur to commemorate the 30th anniversary of the Law on Occupational Risk Prevention. The event will run from 10:00 to 14:00. The programme will be attended by representatives of the conference organisers, the Labour Inspectorate, the Regional Institute (Autonomous Community), the Public Prosecutor for Health and Safety at Work, the social partners from

CEOE, CEPYME, UGT and Autonomous Communities, as well as prevention services and companies from **ANEPA, ASPREM, AESPLA, PRL PREVENCIÓN** and **AMAT**.

On the same day, in room A6.1, **ASEPAL** is organising two events: 'Respiratory protection fit testing' and 'Presentation of the PPE selection guide 2024'.

SICUR is committed to providing comprehensive security solutions. This commitment is further strengthened by **SICUR CYBER**, a space dedicated to cybersecurity co-organised with Seguritecnia and Red Seguridad, and **EXO CORNER**, a new section in collaboration with the Instituto de Biomecánica (IBV) that will address the use of exoskeletons in occupational health and safety. The new space will feature a Speaker's Corner with an engaging programme, including topics such as the first active soft exoskeleton for the hand and the fusion of the body with the exoskeleton.

SICUR 2024 has announced the creation of the EXO CORNER space

This new section has been organised by IFEMA MADRID in collaboration with SICUR and the Instituto de Biomecánica (IBV) from 27 February to 1 March 2024.

SICUR 2024 has announced the creation of **EXO CORNER**, a new section developed in collaboration with the **Instituto de Biomecánica (IBV)**, a national research centre that specialises in exoskeletons. This section will discuss the emergence of exoskeletons in the occupational health and safety industry and their ability to reduce the physical strain on workers during certain tasks.

From **27 February to 1 March**, the latest exoskeletons from manufacturers and distributors, as well as the latest studies and innovations in this field, and services for assessing the impact of incorporating these devices will be showcased at **IFEMA MADRID**.

The entities confirmed as participants in **EXO CORNER**, located in connection core 6-8, and exclusively exhibiting these solutions are the Instituto de Biomecánica (IBV) and the following companies: **Biosafety – Iruña Tecnologías de Automatización, Ergosante – Hapo, Gogoa – Cyber Human Systems** and **Healthy Technical Suits**.

In this new section, along with the stands, experts will give demonstrations and short talks addressing the challenges and opportunities related to the introduction of exoskeletons in occupational health and safety. These devices are part of specialised equipment for military, police, emergency response applications, among others. The talks will also cover the latest developments in these devices. Exoskeletons can enhance comfort and alleviate muscular discomfort. A variety of commercially available models cater to different joints and types of work.

Furthermore, as an illustration of the increasing implementation of exoskeletons for safety purposes, companies like **ITURRI, Panter**, and **Prolians Metalco** will showcase passive exoskeletons for the lumbar, shoulder, neck, or prolonged standing in **Pavilion 6**. They will also present innovative methodologies for measuring ergonomic risk through motion capture.

SICUR 2024 will exhibit innovations in the security sector across four main areas.

Companies and organisations will present their latest technological developments and innovations in the four main areas that SICUR is structured around. The Security section will exhibit advancements in electronic and physical security, as well as security services for the protection of goods and people. The **Fire and Emergency Safety** section will present all products and solutions for passive and active fire protection. The **Occupational Safety** section will feature the latest in occupational risk prevention, personal protective equipment, and new occupational health proposals. Finally, the **Cybersecurity** section will showcase solutions and tools for the protection of information, systems, and data under the umbrella of **SICUR CYBER**, organised in collaboration with the magazines **RED Seguridad** and **Seguritecnia**.

In addition to the commercial offer, the **FORO SICUR** is a key focus due to its potential as a knowledge reference point. It will address some of the most topical issues related to integrated security.

Moreover, the **INNOVATION GALLERY** will showcase the latest research trends and emerging technologies. In 2024, a jury will select 26 proposals, including seven related to Fire and Emergency Safety, seven related to Security, and twelve related to Occupational Safety.

IFEMA MADRID will host SICUR from 27 February to 1 March 2024. SICUR is held every two years and for the second consecutive event year, it will be hybridised through **SICUR LIVEConnect**. This platform will allow virtual connections, information exchange, meetings, and display of the sector's products and services.

SICUR CYBER analyses the challenges and impacts of cybersecurity at SICUR 2024

From 27 February to 1 March experts will address cybersecurity from technical, legal, educational and security perspectives at the International Security Exhibition.

SICUR 2024, the International Security Exhibition organised by **IFEMA MADRID** from **27 February to 1 March**, has announced the programme for the **SICUR CYBER** space, where over the course of four days cybersecurity experts will delve into the latest advances given the growing importance of this subject in the professional and social environment in an increasingly digitalised and connected world.

SICUR CYBER, organised in collaboration with the specialist magazines **Seguritecnia** and **Red Seguridad**, presents a full programme of lectures and round-table discussions where authoritative voices from companies and institutions will address issues related to cybersecurity from technical, legal, educational and law enforcement perspectives.

The programme will begin on **Tuesday, 27 February** with a speech by lawyer Pedro Fernández on **'Innovation and public funding for IT projects'**. Following his appearance, the round table **'Regulatory horizon: NIS 2 and CER transpositions'** will be held, moderated by César Álvarez, Project Coordinator at the Borredá Foundation, with the participation of Antonio Pérez, technical advisor of the National Cryptologic Centre, Rosa Marí Tourís, head of the Regulatory Service of the CNPI, and a representative of OCC. There will also be a lecture presented by Elisa Yamaguchi from SOSAFE on **'Cyber-manipulation: ¿How can we fight the hacking of our brains?'**. The first day will end with the dialogue on **'Cybersecurity in a connected world'** between Guillermo Obispo, coordinator of the Cybersecurity Centre of the Madrid City Council, and José Valiente, director and head of Coordination and Communication of the Industrial Cybersecurity Centre.

Wednesday, 28 February, the second day of the exhibition, will begin with the talk **'Cybersecurity for Security: we are finally on track'**, followed by the second lecture presented by Axis Communications titled **'Cybersecurity in the life cycle of security devices'**. In the late morning the **'National Security Forum: a Guide to Cybersecure Physical**

Security' moderated by Ana Borredá, president of the Borredá Foundation, will be held with the participation of Elena de la Calle from the National Security Department, a representative of the National Cryptologic Centre, Ricardo López, coordinator of the Security Culture Group, and Alfonso Bilbao, coordinator of the Security Culture Group. Natxo Rojo, Business Director at Dorlet Security will round off the morning with **'Recommendations for a Cybersecure Physical Security solution'**. After lunch, Enrique González, deputy director of the magazines Red Seguridad and Seguritecnia, will introduce us to the **'National cybersecurity ecosystem'**, while Pablo López, head of the Cybersecurity Regulations and Services Area of the National Cryptologic Centre will bring the day to a close with his presentation on the **'National Security Scheme'**.

On Thursday, 29 February, the conference will focus on the training and certifications of **Security Engineers in Cybersecurity applied to Physical Security Systems** where the needs, opportunities and methods to achieve them will be addressed with Ricardo Cañizares from the Association of Security Companies and Gustavo Frega, from ISACA, Enrique Bilbao, from AEINSE (Association of Security Engineers) and Alberto Tovar, from CEUSS (Business Confederation of Security and Services Users), moderated by Raúl Aguileraa from AEINSE. Finally, the morning will conclude with a presentation on the importance of cybersecurity in security delivered by Casmar. In the afternoon, experts from the Guardia Civil, the National Police and the Catalan Police Forces (Mossos d'Esquadra) will discuss **'Cybercrime strategies for law enforcement'**.

SICUR CYBER will end on **Friday, 1 March** with a discussion on **'Social Engineering and Physical Security'** with Rafael López, president and rector of Evidentia University of Behavioral and Forensic Sciences, followed by a speech by Pedro Pablo López, president of Continuum, on the **'Treatment of Personal Data for Security Purposes'**. Finally, José Luis González from the technical office of the Directorate General of Guardia Civil and a representative of Women 4 Cyber will discuss **'Training and capacity building in cybersecurity'**, moderated by Juanjo Arenas, chief editor of the Red Seguridad.

The SICUR CYBER programme will also include presentations of technological solutions sponsored by **AXIS, CASMAR; DORLET** and **SOSAFE**, located in the connecting hub between **Halls 8 and 10**.

SICUR 2024 brings together representatives from the Security Forces and Emergency and Civil Protection Bodies

The National Police Force, Guardia Civil, Military Emergency Unit, the Catalan and Basque Regional Police Forces, the Madrid Regional Security and 112 Emergency Agency and Municipal Police Force of Madrid, SAMUR-Civil Defence and the Madrid City Council Fire Brigade will all organise activities, workshops and demonstrations at their stands.

SICUR 2024, the International Security Exhibition organised by **IFEMA MADRID from 27 February to 1 March**, together with the more than 650 exhibiting companies from 31 countries, will be attended by various representatives of the Security Forces, Emergency and Civil Protection bodies, the National Police Force, Guardia Civil, Military Emergency Unit (UME), the Catalan and Basque Regional Police Forces (Mossos d'Esquadra and Ertzaintza, respectively) the Madrid Regional Security and 112 Emergency Agency and Municipal Police Force of Madrid, SAMUR Civil Defence and Madrid City Council Fire Brigade will all organise activities, workshops and demonstrations at their stands so visiting professionals can learn about their equipment and best practices.

At the **National Police** stand, the Sub-directorate General for Logistics and Innovation will provide information on various projects, one of them in collaboration with the General Commissariat of the Scientific Police. From the General Commissariat of Information, an explosives deactivation team, TEDAX, will present one of the unit's new robots along with some technical material. The General Commissariat for Immigration and Border Control will present "Punto Atenas", a police service for detecting false documents and a post to streamline more secure and effective border crossing. The Operations and Digital Transformation Division will bring to SICUR their police drones that assist in investigations and humanitarian work, the Automotive division will present their environmentally friendly Zeta vehicle, while the Telecommunications Division will showcase their most advanced equipment for police operation transmissions. Finally, the Central Private Security Unit, which is part of the General Commissariat for Public Security will update security companies on the latest technological and operational developments.

Dossier de prensa

The **Guardia Civil**, a participant at SICUR since 2010, will improve its image as a cutting-edge Police Force with the very latest in security technology and show its commitment to Spanish companies. The Rapid Action Unit will introduce a drone and anti-drone system, UAS and C-UAS systems and weaponry and tactical equipment specific to the GAR unit. The CBRN Explosive Deactivation and Disposal Service will present a MINI CALIBER explosive disposal robot, an CBRN defence mannequin and a radiation monitor and contaminometer. The Reserve and Security Group will have a mannequin with an intervention and crowd control uniform, GO PRO camera with chest harness and incapacitating electric taser. The Traffic Group will present a BMW motorbike and drug detection equipment, breathalysers and service PDA. The Nature Protection Service will exhibit an electric motorbike and a camera trap, a fire investigation case, a terrestrial telescope and a water case and/or laboratory. The Support Services Headquarters will present their textile innovations with four mannequins presented in clothing and new official footwear. Finally, the Technical Services Headquarters through its Technological Innovation and Information Security Service will increase its network of contacts with companies, administrations, universities, etc. in the field of Research, Development and Innovation (R&D&I).

The **UME**, being a benchmark of the Armed Forces in the emergency sector will present the Drones unit (UDRUME) that is currently in the process of being set up. They will also demonstrate some of their material and their skills in the areas of technical search, rescue of the injured and the extraction of victims in urban environments. On 1 March at the SICUR Forum, they will present the UDRUME project and illustrate this type of action with the support of drones in their operations in La Palma and Chile, as well as their intervention in the aftermath of the earthquake in Turkey last year.

The **Mossos d'Esquadra**, Catalonia's autonomous police force, will exhibit at its stand an all-terrain vehicle with advanced features that has recently been incorporated among the resources of the Advanced Command Centres and an electric patrol vehicle with implementation of various technological solutions for the synchronisation of recorded and transmitted images, with the new Personal Recording Devices that are currently being rolled out and the use of the vehicle's own multimedia screen as a management element for access to the different systems or police information. Coinciding with the implementation of the new uniforms of the citizen security units, there will be two mannequins with the uniforms of the Guardia de Honores (operational working uniforms from the early 20th century) and

Dossier de prensa

with the current uniforms to show their evolution and the resources of an image that persists over time. Various headpieces will also be on display, together with symbolic elements showing the progress of materials used over the last 25 years. Finally, a high-performance drone with fixed wing and multi-rotor flight capabilities will also be on display, enabling high-precision long-range aerial operations, together with the latest capabilities in image transmission and reception management.

The stand of the **Ertzaintza**, the autonomous police force of the Basque Country, will be an institutional meeting point for security agencies, companies, embassies and public bodies. Visitors will also be able to watch a rescue drill carried out by the Surveillance and Rescue Unit through 360 vision glasses.

The functions and competencies of **Madrid's regional security and emergency services** will be demonstrated within the **ASEM-112** framework, displaying the material sources that are available to the responders: Fire Brigade, Forestry Agents Body, Madrid 112 Emergency Centre, Integral Emergency Services Training Institute, Civil Protection and the Emergency Medical Service of the Community of Madrid (SUMMA 112).

The Fire Brigade will construct a large display with a backlit panel showing images of various manoeuvres carried out in interventions, a ledge with a torch for technical fire, a Hexacopter drone or a model 'smoke house' explaining how fires develop in homes, complemented by an audiovisual presentation of drills and outreach activities.

Forestry Agents will present material for the investigation of forest fires, environmental crimes and personal protection equipment for extinguishing and working at heights. They will also explain their functions and actions, as well as tell the story of "Rosa the Forestry Agent" with the use of a Playmobil diorama.

The Madrid 112 Emergency Centre will have a demonstration of live calls through the SIGE 112 (Integral Emergency Management System) platform with a chance to have a virtual tour of the ASEM 112 building, where the emergency telephone operations room is located.

The Emergency Medical Service of the Community of Madrid (SUMMA 112) will give a first-aid demonstration and an exhibition with emergency care material.

The Integral Emergency Services Training Institute (IFISE) will explain its their functions, emphasising the selective courses of Basic Training for local police and Civil Protection, together with police promotion courses.

Finally, Civil Protection will present the activities of its own groups and those of the Immediate Response team of Emergency Volunteers. It will also display mannequins with the official uniforms of the service, helmets and a device connected to the TETRA network.

The **Municipal Police Force of Madrid's** stand will be exhibiting the latest technological innovations of the Air Support Services (drones), the Central Commissariat for Security and the Commissariat of the Judicial Traffic Police. They will showcase a police vehicle equipped with cutting-edge technologies and video surveillance, a recently acquired operating intervention vehicle, an operator post with the IRIS system and an integrated video surveillance system equipped with Artificial Intelligence, a recently purchased BMW 1250 RT motorcycle, operational tactical communication elements and mobile tripod radars. There will also be breathalyser and drug testing demonstrations and an exhibition of UAS (drones) with a screen showing recent police interventions

The **SAMUR-Civil Protection** stand will have an exhibition section where they will be presenting their "Mobile Pharmacy" vehicle, a Special Procedures vehicle for logistical and CBRN support, a first-response motorcycle and bicycle used in high-occupancy events, self-protection material of the responder and the latest technologies in electro-medical equipment. Besides, there will be workshops on topics of the CPR, haemorrhage and airway protection.

Madrid Firefighters will have a self-scaled vehicle at its stand and, as a novelty, will have an experimental classroom focused on the prevention of fires and household risks through information and education activities and workshops

Meanwhile, representatives of the Guardia Civil, National Police, Mossos d'Esquadra and Ertzainza will take part in **SICUR CYBER** on 29 February at 16:00 as part of the round table discussion on 'Cybercrime Strategies of Security Forces and Bodies'.
